## OBJECTIVE

AWS Certified Cloud Practitioner and AWS re/Start Graduate with a solid background in cloud computing, Linux, and DevOps basics. I am highly motivated and quick to learn new technologies. I want to contribute to cloud and automation projects by using my problem-solving skills and practical AWS experience. I am eager to join a vibrant organization that values innovation, ongoing learning, and technical development.

---

## WORK EXPERIENCE

Jul 2025 - Nov 2025

### AWSre/Start Program — Internship

- Trained in AWS core services, Linux, networking fundamentals, and Python.
- Collaborated on team projects to design and deploy cloud-based solutions.
- Deployed a website using Amazon S3 and EC2 instances configured with Apache (httpd) and Nginx web servers.

---

## EDUCATION

Bachelor of Computer Applications(**BCA**)

2022-2025

DRBCCC Hindu College, Pattabiram, Chennai.

---

## PROJECTS

### AWS S3 - Static Website Hosting

- Deployed a static portfolio website using Amazon S3 for secure and scalable hosting.
- Configured public access policies and bucket permissions for static content delivery.
- Implemented versioning and static error pages for reliability and user experience.

### AWS EC2 with Apache2 - Web Server Deployment

- Configured an EC2 instance to host a website using the Apache2 HTTP server.
- Set up inbound rules via Security Groups to allow HTTP/HTTPS access securely.
- Used WinSCP for file transfer.
- Managed server files and directories using Linux commands over SSH.
- Automated startup services and verified deployment through browser-based testing.
- Gained hands-on experience in web hosting, Linux administration, and AWS networking.

### NOVA – Voice Assistant

- Developed a Python-based voice assistant enabling hands-free control of Windows systems.
- Built with PyQt for GUI, speech recognition, and multithreading for smooth performance.
- Implemented voice-controlled automation for apps, browser, email, and media tasks.
- Enabled wake-word activation with modular, scalable architecture for future NLP integration.

### V-Chat (Django)

- Developed a full-stack Instagram-like web app using Django, featuring photo sharing, likes, comments, and user profiles
- Integrated real-time chat with Django Channels and WebSockets, backed by Redis
- Implemented secure user authentication and customizable profile pages
- Designed a responsive UI using Bootstrap 5, optimized for both desktop and mobile devices
- Added real-time notifications for messages and interactions to enhance user engagement

---

## SKILLS

- Cloud Services: AWS EC2, S3, IAM, VPC, RDS, Route 53.
- DevOps & Tools: GitHub, Linux, Nginx, Apache HTTPD, Visual Studio Code, Terraform (Basic)
- Programming: Python, HTML, CSS
- Databases: MySQL
- Operating Systems: Windows, Linux, Ubuntu Other.
- Other Tools: PuTTY (Remote Access & SSH), PuttyGen (Key Conversion)

---

## CERTIFICATION COURSES

- **Infosys** - Prompt Engineering
- **Infosys** - Introduction to Artificial Intelligence
- **Google Cloud** - Introduction to Generative AI
- **IBM** - python 101
- **AWS** - RE/Strat Graduate
- **AWS** - AWS Cloud Practitioner

---

## EXTRA-CURRICULAR ACTIVITIES

### Coordinator & Documenter, Synergy Quiz Club , DRBCCC HINDU COLLEGE

- Organized and hosted quiz programs and events with high student participation.
- Provided technical support and helped in managing quiz for club activities.
